PROFESSIONAL PROFILE

Gameplay programmer and technical game designer focused on Unreal Engine 5 gameplay systems, AI behavior, multiplayer features, and combat mechanics. Currently contributing to a studio-developed cooperative game at Nimbus Games. Built a configurable adaptive boss combat system and editor utility tool, bringing gameplay design through implementation, debugging, and iteration.

PROFESSIONAL EXPERIENCE

Nimbus Games — Gameplay Programmer Intern | Sep 2026 – Present | Malaysia

Project: Escape: Malice | First-person cooperative puzzle-horror game

- Contribute to gameplay features and interactive systems using Unreal Engine 5 and Blueprint visual scripting.
- Implement and debug multiplayer gameplay behavior using actor replication, client/server RPCs, and multicast events.
- Develop and refine enemy AI and gameplay reactions, including state-based behavior and perception-driven interactions.
- Investigate and test gameplay, animation, and networked event flows to improve consistency during multiplayer play.
- Collaborate with a multidisciplinary development team through testing, iteration, and version-controlled workflows.

SELECTED PROJECTS

Adaptive Combat Tool — Unreal Engine 5 | Final Year Project

Adaptive boss combat system and designer-facing editor utility

- Built a player-intent system classifying behavior as Aggressive, Defensive, Panic, or Balanced from attacks, dodges, distance, and health.
- Implemented four configurable boss combat modes with adjustable attack timing, movement, range, and damage; supported Adaptive and Fixed Rules modes.
- Created an Editor Utility Widget for boss setup, AI configuration, parameter tuning, player integration, and validation without editing core gameplay logic.
- Implemented combo attacks, directional dodges, animation-driven combat, weapon hit detection, and boss chase/attack behavior.

Whispers of the Peak — Unreal Engine 5 | Team Project | Project Lead

First-person survival horror

- Led game direction across story, environment layout, and UI direction while collaborating with a four-person team.
- Contributed hands-on gameplay and content implementation, including combat hitboxes, character/animation integration, and surface-based footstep audio.

TECHNICAL & DESIGN SKILLS

Engine & Implementation: Unreal Engine 5, Blueprint Visual Scripting, C++, Animation Blueprints, Editor Utility Widgets

Gameplay & Networking: Combat Systems, Character Mechanics, Hit Detection, Multiplayer Gameplay, Actor Replication, Client/Server RPCs, Multicast Events

AI & Game Design: State-Based AI, Perception-Driven Behavior, Player Intent Classification, Combat Design, Systems Design, Encounter Design, Prototyping, Level Blockouts

Tools & Production: Gameplay Debugging, Git, Perforce (P4V), Blender, Gaea, Asset Integration, Animation Retargeting

EDUCATION & LANGUAGES

Universiti Teknikal Malaysia Melaka (UTeM) | Bachelor of Information Technology (Game Technology) with Honours | Expected 2027

Languages: Arabic (Native) | English (Professional Working Proficiency)
